Project: Presentation
20pts

Date: Thursday, May 16

Overall Objective

The purpose of this session is to present your project to the class. Most of your project is expected to be done by that date. The objective is to use this session feedback to do the review your project and submit a final report by next week. Each group will have **15-20 minutes** for **presentation + Q&A**. Your presentation will be graded by your instructor and your peers.
In addition, you are expected **to submit your presentation** (ppt, pdf) before the presentation date.
The following elements will be expected in the presentation and will be evaluated using the Peer Evaluation forms:

1. A short description of the organization your chose for your project and, if applicable, the area you decided to focus on.

2. A description of all the entities and attributes used. Some entity/attribute naming may have names that require some explaining.

3. An explanation of the business rules.

4. A complete EER diagram. (Before and After relational model)

5. A complete 3NF relational model.

6. A list of data used when creating your database.

7. A presentation of your SQL Queries (SELECT) including the queries syntax and the results.
    Note:
    *   You are required a minimum of **5 Queries** using various SQL elements covered in class (condition, sorting, grouping, multi-table queries)
    *   **For the Presentation only,** you are not required to present the SQL statement creating tables or loading data in your tables.

Feel free to add any additional information you believe to be essential to the good understanding of your project.
You can also refer to the Peer Evaluation Form for an overview of the grading rubrics.
